Econometrics Beat: Dave Giles' Blog: Dummies for Dummies These seminars were based on a recently completed research paper of mine (Giles, 2011a). The main point of that paper is to derive the exact sampling distribution of a particular statistic that arises naturally when estimating a log-linear regression model with one or more dummy variables as regressors. Density Forecasts in Panel Data Models 1 Introduction Panel data, such as a collection of rms or households observed repeatedly for a number of periods, are widely used in empirical studies and can be useful for forecasting individuals' future outcomes,
